

SEO & GEO Auditor - Coverage Comparison

Generated: June 9, 2026

Compares three reference PDFs against the current SEO_GEO_Auditor application (127 parameters across 15 categories). The app audits a single URL per run with a shallow internal crawl (~25 pages). Semrush and baseline PDFs report whole-site or property-level aggregates.

Legend: ****Yes**** = implemented and auto-calculated (Connected Mode counts for first-party GA4/GSC). ****Partial**** = related check exists but differs in scope, granularity, or bot name. ****No**** = not implemented.

Executive Summary

Section	Source PDF	Total checks	Yes	Partial	No
1	Performance Baseline (GA4/GSC/CWV)	23	3	6	14
2	Semrush Full Site Audit	96	35	26	35
3	Semrush AI Search Overview	13	2	5	6
Total		**132**	**40**	**37**	**55**

Top gaps: property-level analytics dashboard (users, channels, keywords, device/country), full-site crawl inventory, expanded AI bot user-agent matrix (ChatGPT-User, OAI-SearchBot, etc.), time-series trend charts, form/exit-page reporting.

Section 1 - Performance Baseline PDF

Source: Performance_Baseline-Traffic_Engagement_SEO_Web_Vitals_Feb_20_20-21st_May_2026.pdf

Parameter	Calculated in SEO_GEO_Auditor?	App parameter / notes
Engagement Rate	Partial	Used inside Pogo-sticking risk (UxAgent); not a standalone KPI
Total Users	No	GA4 client queries per-page metrics only; no property-level user counts
New Users	No	Not queried from GA4
Average Session Duration	Partial	Dwell time / scroll depth via GA4 when Connected Mode
Bounce Rate	Partial	Bounce rate in context via GA4 when Connected Mode
Clicks by Device (Mobile/Desktop/Tablet)	No	GSC device dimension not implemented
Clicks by Country	No	GSC country dimension not implemented
Organic traffic trend (top pages traffic %)	No	No site-wide traffic ranking dashboard
Traffic by source (organic/direct/referral)	No	No GA4 channel-group reporting
Session source breakdown (google/bing/yahoo/etc.)	No	Not implemented
Organic Social traffic	No	Not implemented
Session primary channel group	No	Not implemented
Top ranking keywords (CTR, position, clicks, impressions)	Partial	Page-level GSC data in Click-through rate (CTR) only; no keyword top-20 list
Bounce rate trend (time series)	No	Point-in-time only; no charts
Average engagement time trend (time series)	No	Point-in-time only; no charts
Pages per session	No	Not in GA4 query
Mobile vs Desktop traffic split	Partial	Mobile vs desktop delta scores CWV gap, not traffic/users split
LCP (Core Web Vitals)	Yes	CoreWebVitalsAgent via PageSpeed Insights
CLS (Core Web Vitals)	Yes	CoreWebVitalsAgent via PageSpeed Insights

Parameter	Calculated in SEO_GEO_Auditor?	App parameter / notes
INP (Core Web Vitals)	Yes	CoreWebVitalsAgent via PageSpeed Insights
Page load speed - Desktop	Partial	Lighthouse performance score + LCP/TTFB; not dedicated load-speed KPI
Page load speed - Mobile	Partial	Same PSI mobile run; not dedicated load-speed KPI
Form submissions by type	No	No GA4 event/conversion tracking
Top exit pages	No	Not implemented

Section 1 totals: Yes 3, Partial 6, No 14

Section 2 - Semrush Full Site Audit PDF

Source: Semrush-Full_Site_Audit_Report-optiorx_com-6th_Feb_2026.pdf

Errors

Parameter	Calculated in SEO_GEO_Auditor?	App parameter / notes
Pages returned 5XX status code	Partial	Broken links + HTTP status check sampled links; no site-wide 5XX inventory
Pages returned 4XX status code	Partial	Broken links samples 4xx; no site-wide 4XX page count
Pages don't have title tags	Yes	Title tag (CrawlabilityAgent / OnPageAgent)
Issues with duplicate title tags	Partial	Title tag checks current page only; no cross-site duplicate detection
Pages have duplicate content issues	Partial	Duplicate content checks canonical on page; no near-duplicate fingerprinting
Internal links are broken	Yes	Broken links (TechnicalAgent crawl sample)
Pages couldn't be crawled	No	No crawl-failure taxonomy or site-wide inventory
Pages couldn't be crawled (DNS resolution issues)	No	Not implemented
Pages couldn't be crawled (incorrect URL formats)	Partial	URL structure checks current URL; no crawl URL-format audit
Internal images are broken	No	Image alt coverage only; no broken-image status checks
Pages have duplicate meta descriptions	Partial	Meta description on current page; no cross-site duplicate detection
Robots.txt file has format errors	Yes	robots.txt (CrawlabilityAgent)
sitemap.xml files have format errors	Yes	sitemap.xml (CrawlabilityAgent)
Incorrect pages found in sitemap.xml	Partial	sitemap.xml validates existence and lastmod; not full URL validation
Pages have a WWW resolve issue	No	Not implemented
This page has no viewport tag	Yes	Mobile viewport (TechnicalAgent)
Pages have too large HTML size	No	Not implemented
AMP pages have no canonical tag	Partial	AMP / Web Stories checks AMP presence; optional informational
Issues with hreflang values	Yes	hreflang (TechnicalAgent)
hreflang conflicts within page source code	Partial	hreflang checks x-default; not full conflict detection
Issues with incorrect hreflang links	Partial	hreflang basic validation only
Non-secure pages	Yes	HTTPS / SSL (TechnicalAgent)
Issues with expiring or expired certificate	Partial	HTTPS / SSL checks tls_ok; not certificate expiry date
Issues with old security protocol	No	Not implemented
Issues with incorrect certificate name	No	Not implemented
Issues with mixed content	Yes	HTTPS / SSL checks mixed content
No redirect or canonical to HTTPS homepage from HTTP	Partial	HTTPS / SSL on audited URL; not HTTP-homepage-specific check

Parameter	Calculated in SEO_GEO_Auditor?	App parameter / notes
Pages with a broken canonical link	Yes	Canonical tags (CrawlabilityAgent)
Pages have multiple canonical URLs	Partial	Canonical tags checks single canonical presence
Pages have a meta refresh tag	No	Not implemented
Issues with broken internal JavaScript and CSS files	No	Not implemented
Subdomains don't support secure encryption algorithms	No	Not implemented
sitemap.xml files are too large	No	Not implemented
Links couldn't be crawled (incorrect URL formats)	No	Not implemented
Structured data items are invalid	Yes	Schema.org JSON-LD + Rich result eligibility
Pages are missing the viewport width value	Yes	Mobile viewport (width=device-width check)
Pages have slow load speed	Partial	LCP, TTFB, Lighthouse scores via PSI; not Semrush load-speed threshold

Warnings

Parameter	Calculated in SEO_GEO_Auditor?	App parameter / notes
External links are broken	Partial	Broken links focuses on crawl sample; external monitoring limited
External images are broken	No	Not implemented
Links on HTTPS pages lead to HTTP page	Partial	HTTPS / SSL mixed-content check partially covers
Pages don't have enough text within title tags	Yes	Title tag (50-60 char heuristic)
Pages have too much text within title tags	Yes	Title tag length check
Pages don't have an h1 heading	Yes	Heading hierarchy (single H1)
Pages have duplicate H1 and title tags	No	Not implemented as separate check
Pages don't have meta descriptions	Yes	Meta description (OnPageAgent)
Pages have too many on-page links	No	Not implemented
URLs with a temporary redirect	Partial	HTTP status & redirects flags 302; not site-wide redirect inventory
Images don't have alt attributes	Yes	Image alt coverage (OnPageAgent)
Pages have low text-HTML ratio	No	Not implemented
Pages have too many parameters in their URLs	Yes	URL structure (<=2 query params)
Pages have no hreflang and lang attributes	Partial	hreflang when present; lang attribute not checked
Pages don't have character encoding declared	No	Not implemented
Pages don't have doctype declared	No	Not implemented
Pages have a low word count	Yes	Word count / content depth (OnPageAgent)
Pages have incompatible plugin content	No	Not implemented
Pages contain frames	No	Not implemented
Pages have underscores in the URL	Yes	URL structure (no underscores in path)
Outgoing internal links contain nofollow attribute	No	Not implemented
Sitemap.xml not indicated in robots.txt	Partial	robots.txt + sitemap.xml checked separately; not cross-reference
Sitemap.xml not found	Yes	sitemap.xml (CrawlabilityAgent)
Homepage does not use HTTPS encryption	Partial	HTTPS / SSL on any audited URL; not homepage-specific
Subdomains don't support SNI	No	Not implemented
HTTP URLs in sitemap.xml for HTTPS site	No	Not implemented
Uncompressed pages	No	Not implemented

Parameter	Calculated in SEO_GEO_Auditor?	App parameter / notes
Issues with blocked internal resources in robots.txt	No	Not implemented
Issues with uncompressed JavaScript and CSS files	Partial	PSI audits partially cover resource optimization
Issues with uncached JavaScript and CSS files	No	Not implemented
Pages have JS/CSS total size too large	Partial	Third-party script impact + render-blocking via PSI
Pages use too many JavaScript and CSS files	No	Not implemented
Issues with unminified JavaScript and CSS files	Partial	PSI best-practices audits partially cover
Link URLs are too long	Partial	URL structure checks page URL <115 chars; not link URL length

Notices

Parameter	Calculated in SEO_GEO_Auditor?	App parameter / notes
Pages have more than one H1 tag	Yes	Heading hierarchy (exactly one H1)
lms.txt not found	Yes	lms.txt (AiBotCrawlabilityAgent - GEO)
Pages are blocked from crawling	Yes	Meta robots + robots.txt (CrawlabilityAgent)
Page URLs are longer than 200 characters	Partial	URL structure threshold is 115 chars on current URL
Outgoing external links contain nofollow attributes	No	Not implemented
Robots.txt not found	Yes	robots.txt (CrawlabilityAgent)
Pages have hreflang language mismatch issues	Partial	hreflang basic check; not full language mismatch
Subdomains don't support HSTS	Partial	HTTPS / SSL checks HSTS header on response
Orphaned pages in Google Analytics	No	Not implemented
Orphaned pages in sitemaps	No	Not implemented
Pages blocked by X-Robots-Tag: noindex HTTP header	Yes	Meta robots checks X-Robots-Tag header
Issues with blocked external resources in robots.txt	No	Not implemented
Issues with broken external JavaScript and CSS files	No	Not implemented
Pages need more than 3 clicks to be reached	Yes	Crawl depth (max internal depth <=3)
Pages have only one incoming internal link	Partial	Internal links + anchor text; no orphan incoming-link inventory
URLs with a permanent redirect	Partial	HTTP status & redirects; not site-wide 301 inventory
Resources are formatted as page link	No	Not implemented
Links on this page have no anchor text	Partial	Internal links + anchor text (descriptive % heuristic)
Links have non-descriptive anchor text	Partial	Internal links + anchor text (descriptive % heuristic)
Links to external pages returned 403 HTTP status	No	Not implemented
lms.txt has formatting issues	Partial	lms.txt checks existence only; no format validation
Pages contain too much content	No	Not implemented
Pages have outdated content	Partial	Content freshness signals (date regex heuristic)
Pages have low semantic HTML usage	Yes	Semantic HTML (ExtractabilityAgent - GEO)
Pages require content optimization	Partial	LLM-based depth/keyword checks; no Semrush optimization score

Section 2 totals: Yes 35, Partial 26, No 35

Section 3 - Semrush AI Search Overview PDF

Source: Semrush-Site_Audit__Overview-optiorx_com-9th_Jun_2026.pdf

Parameter	Calculated in SEO_GEO_Auditor?	App parameter / notes
Site Health score (percentage)	Partial	Category + final letter grade; different methodology than Semrush
AI Search Health score (percentage)	Partial	GEO report final score; not Semrush AI Search Health model
Crawled pages stats (Blocked/Redirect/Broken/Healthy)	No	Single-page audit; no site-wide page inventory
Pages blocked from AI search (aggregate %)	Partial	AiBotCrawlabilityAgent per-page robots checks; no site-wide %
ChatGPT-User bot blocking	No	App checks GPTBot, not ChatGPT-User
OAI-SearchBot bot blocking	No	Not in bot user-agent list
Googlebot blocking	No	Not checked (only Google-Extended)
Google-Extended bot blocking	Yes	AiBotCrawlabilityAgent (GEO)
PerplexityBot bot blocking	Yes	Grouped in GPTBot / ClaudeBot / PerplexityBot
Perplexity-User bot blocking	No	Not in bot user-agent list
Claude-User bot blocking	No	App checks ClaudeBot, not Claude-User
Claude-SearchBot bot blocking	No	App checks ClaudeBot, not Claude-SearchBot
Top Issues list (Errors/Warnings dashboard)	Partial	Report lists failing parameters; not Semrush-style issue dashboard

Section 3 totals: Yes 2, Partial 5, No 6

Appendix - Summary Counts

Section	Yes	Partial	No	Total
1 - Performance Baseline	3	6	14	23
2 - Semrush Full Site Audit	35	26	35	96
3 - Semrush AI Search Overview	2	5	6	13
Grand total	**40**	**37**	**55**	**132**

Status key: Yes = auto-calculated (Connected Mode for GA4/GSC). Partial = related check with scope/threshold/bot-name differences. No = not implemented.

SEO_GEO_Auditor implements 127 native parameters in backend/app/agents/ (67 SEO + 60 GEO). This comparison maps external PDF metrics to that implementation.
